

Siuslaw Watershed Council

June 2011

MEETINGS ON THE MOVE • Our watershed service is large & encompasses many communities. We will be moving our General Meetings to three of these communities this summer. See the meeting box for details

COMPETING PLANTS? • Grasses and other brush are competing with the native seedlings for sun, water, and nutrients. You can release your seedlings by cutting back or clearing a 3-5ft diameter circle around your new seedlings. Release assistance may be available in July. Contact Ginger at the SWC Office to be added to the list.

AQUATIC PASSAGE PROJECTS • Info about this summer's projects at www.siuslaw.org/culverts.
