### Free Native Plants Available

The Siuslaw Watershed Council (SWC) will once again provide free native plants for riparian (waterside) planting in the Siuslaw and Coastal Lakes areas.

Planting trees and shrubs cleans the air we breathe, improves water quality, creates wildlife habitat, and soothes the soul!

## TREES

**Western redcedar**—Coniferous. Grows to 150'-200' tall. Occurs mostly in wet soils and usually in shaded forests. Grows best on seepage and alluvial sites, but also occurs in drier habitats.

**Grand fir**—Coniferous. Grows to 140'-200' tall. Adaptable in regard to soil. Usually in full sun or partial shade. Releases fragrance of oranges when crushed.

**Sitka spruce**—Coniferous. Grows to 125'-180' tall. Prefers moist, well-drained sites within the fog belt. Tolerates sandy soils. *\*Reserved for coastal watershed sites.*

**Black cottonwood**—Deciduous. Grows to 150' tall. Prefers moist soil and full sun but is very tolerant. Winter buds are very resinous and fragrant with a balsam odor.

**Western hemlock**—Coniferous. Generally grows to 100'-150' tall. Grows mostly in wet soils and prefers partial shade, especially in areas with hot summers.

**Incense cedar**—Coniferous. Grows to 100'-130' tall. Prefers full sun to partial shade and is drought and fire tolerant. Used by birds for winter foraging.

**Shore pine**—Coniferous. Grows to 100' tall with pillowy crown and often irregular trunk. Tolerates low-nutrient conditions of coastal dunes and rocky shores. *\*Reserved for coastal watershed sites.*

**California-laurel**—Broadleaf evergreen that grows to 70'-90' tall. Prefers moist, well-drained soils. Tolerates full sun or shade. Known in Oregon as myrtlewood.

**Oregon white oak**—Deciduous. Grows to 80' tall. Generally intolerant to shade and will die if overtopped. Particularly suited to exposed sites that are dry in summer. *\*Reserved for eastern watershed sites.*

**Bigleaf maple**—Deciduous. Grows over 75' tall on moist sites in full sun and partial shade. Grows rapidly from 5 to 15 years old.

**Oregon ash**—Deciduous. Grows 40'-80' tall in sun or partial shade. Survives standing water in winter months.

**Black hawthorn**—Deciduous. Grows to 30'-40' tall. Prefers moist soils but is tolerant in regard to soil and shade. Grows thorns up to 1" long on branches.

## SHRUBS

**Cascara**—Grows to 30' tall. Prefers moist, well-drained soils. Tolerant to sun or shade. Brilliant fall foliage.

**Blue elderberry**—Grows to 30' tall in moist, well-drained, sunny soil. Early seral shrub that thrives in openings of moist forests. Dominant understory species.

**Red elderberry**—Large shrub up to 30' tall often found on sunny, moist forest edges.

**Vine maple**—Grows to around 20' tall. Likes moist soils in riparian and understory conditions. Grows well in full sun or deep shade.

**Oceanspray**—Grows to 15' tall in open or disturbed, moist sites. Prefers partial shade. Adaptable in regard to soil type. Deer resistant. Attracts butterflies.

**Mock orange**—Shrub growing to 12' tall. Tolerates dry to moist sites in sun to partial shade. White flowers attract butterflies.

**Osoberry**—Grows to around 12' tall and 12' wide. Early-season nectar source for hummingbirds and other pollinators. Commonly known as Indian plum.

**Redosier dogwood**—Grows to 7'-10' tall and enjoys full sun to partial shade and medium to wet soil conditions. Likes organically-rich, fertile soils and grows in swampy or boggy areas where other plants tend to fail.

**Pacific ninebark**—Grows 5'-10' tall and likes full sun or partial shade. Good for mitigating bank erosion.

**Red flowering currant**—Grows 3'-10' tall and can be grown in full sun, but prefers partial shade. Enjoys moist, well-drained soils.

**Nootka rose**—Grows anywhere from 2'-10' tall. Grows in both full sun and partial shade. Likes moist soils and can tolerate flooding.

**Douglas spirea**—Reaches 4' or more and blooms in early to mid-summer with fragrant pink to purple flower plumes. Likes moist, sunny, open areas.

**Snowberry**—Grows to about 3' tall and enjoys full sun or partial shade. Found naturally along stream banks and in swampy thickets, but thrives in dry areas as well.

**Willow**—Grows to 25' tall. Pacific and Sitka willow harvested in the Siuslaw area. Both prefer wet soils. Three-foot stakes.
